

Polyethylene ring

Version	Colour	Length	References
PAMTIGHT 600	White	1965 mm	CDPE60RF-J
PAMTIGHT 800	White	2500 mm	CDPE80AZ-J
REXEL 1	Green	1845 mm	CDR60BF-J
RC40	White	1910 mm	CDRC60CF-J
G-TEX / PAYSAGE / TEK / MEDIUM / B-TEC	White	1850 mm	CDGX60AF-J

The polyethylene ring is a ring which has a soundproofing function.

It's necessary to be ensured, during the handling of covers and notably before the closing, that the polyethylene ring is free from dirtinesses and to clean it if's necessary.

The presence of dirtinesses (for example small stones) between the cover and the ring involves the premature degradation of this one.

In the event of degradation, it's imperative to change the ring quickly.

The change is carried out by unsnapping of degraded ring and reinstallation of a new ring adapted to the manhole cover.

The information on this sketch is, to the best of our knowledge correct at the time of printing.
