Quality Assurance

The information given in this literature is, to the best of our knowledge, correct at the time of going to print. However, we're constantly looking at ways of improving our products and services and therefore reserve the right to change, without prior notice, any of the data contained in this publication. Any orders placed will be subject to our Standard Conditions of Sale, which are available on request.

We are proud to manufacture our solutions

Saint-Gobain PAM proudly remains at the forefront of the design and manufacture of high-performance ductile iron access cover and gully grating solutions for the infrastructure, civil engineering, water and utilities sectors.

We ensure that our products are manufactured to the highest health and safety, quality and environmental standards. Below are details of our system, product and sustainability accreditation.

SYSTEM, PRODUCT AND SUSTAINABILITY ACCREDITATION

Product Certification BS EN 124-2:2015 access covers and gratings kitemark licence number KM30794

BS 5834-2 specification for small surface boxes kitemark licence number KM07199

BS 5834-3 specification for large surface boxes kitemark licence number KM14164

BS EN ISO 9001 Quality management systems kitemark licence number FM12908

BS EN ISO 14001 Environmental management systems kitemark licence number EMS83973

ISO 45001 Health & safety management systems kitemark licence number OHS 570684

Carbon Reduce Carbon Reduce certification demonstrates our commitment to measuring, managing and reducing greenhouse gas emissions in a robust and credible way. Certificate number 2016053J

BES 6001 Responsible sourcing of construction materials kitemark licence number BES613621

SLOTFORM
Install Plus installation shuttering system

SUSTAINABLE SOLUTIONS DESIGNED AND MANUFACTURED IN THE UK

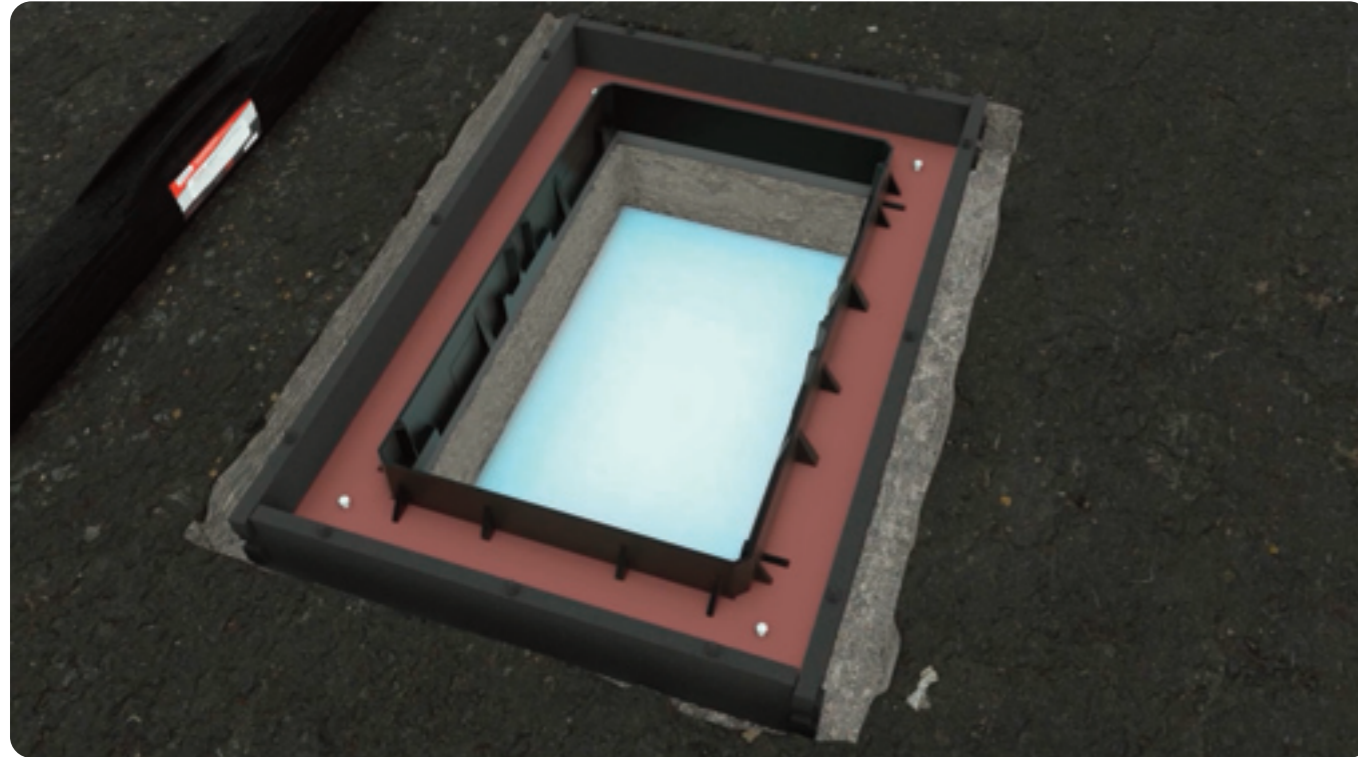

Supporting the reduction of whole-life costs

SLOT FORM

SLOTFORM Install Plus installation shuttering system

SlotForm is the latest addition to the Install Plus range of ironwork installation solutions. It is designed to make the installation of our high-performance access covers and gully gratings even easier.

SlotForm is ideal for ironwork installations and reinstatements where the installation materials being used don't require compaction, such as flowable bedding mortars.

Each size of SlotForm has been designed to allow the minimum 50mm space beyond the edge of the frame flange as required by legislation such as Specification for the Reinstatement of Openings in Highways (commonly known as SROH).

Defining the area where the flowable mortar is placed enables an accurate calculation of the optimal amount of material needed. Using the correct amount of material eliminates waste and reduces cost while ensuring a robust right first time installation.

Its modular design makes it easy to handle and transport. It's also simple to use and requires no specialist tools. Simply connect each section together using the locator dowels and add more layers to achieve the required depth, each plank is 100mm high.

SlotForm is made in the UK from durable recycled HDPE, meaning it's UV stable, resistant to chemical attack and impervious to water, frost, and most corrosive substances.

At approximately 2kg per metre of material, it's lightweight making it safe and easy to handle.

It's supplied in kit form, with each kit containing the components to create one layer of shuttering.

It's available in four sizes to suit 600 x 600mm, 915 x 445mm, 1220 x 685mm and 1830 x 685mm clear opening access covers, with other sizes being added to the range soon.

For more information and simple to follow instructions on how to use SlotForm, scan the QR code or contact us on:
