

Foot check valve with strainer

The axial foot check valve Type 302 is designed for the equipment of the pumping station. When the pumping stops, the disc is quickly closed by spring pressure before any overpressure occurs due to the return flow.

Characteristics:

- Axial disc foot valve for protection and non-return on pumping equipment for either clean and/or filter water
- High hydraulic performance
- Total sealing (from 3 m.w.c. in vertical position)
- Silent operation
- May be fitted in horizontal or vertical position
- Excellent water hammer performance
- Temperature from -10°C to 10°C
- Anti-corrosion epoxy protection
- Easy maintenance

Range

- DN65 to 100 in PFA 16
- DN125 to 300 in PFA 10
- On request : PFA 16 Type 312 from DN125 to 300
