## Field of use

- The range ULTRAQUICK is designed for the drinking water networks, the fire networks, and the irrigation networks.
- The EPDM elastomer type WC in conformity with NF EN681-1 can be used in sewage networks and rain water networks

## Design characteristics

- The ultra large tolerance flange adaptors cover all the outside diameters of pipe (DE) from 49 to 348 mm, without discontinuity,
- For each model the maximum DE is higher than the minimum DE of the following model : ex: DE Maxi A = 71 DE Mini B = 62 - Margin =9 - DE Maxi H = 241 DE Mini I = 235 - Margin =6
- Possible angular deflection: 6 degrees (see drawing page 4).

## Material and coatings

## Version with carbon steel screws

Item	Component	Material	Coating
1	Body	FGS	Blue epoxy powder 250 microns average thickness with a minimum of 200 microns, conforming to EN 14901-1 (PECB)
2	Gland ring	FGS	Blue epoxy powder 250 microns average thickness with a minimum of 200 microns, conforming to EN 14901-1 (PECB)
3	Sealing ring	EPDM (*)	
4	Bolt	Grade 6.8 steel	Geomet 720
5	Nut	Grade 6 steel	Geomet 720
6	Washer	Mild steel	Geomet 720

(\*) EPDM elastomer type WA, WC in conformity with NF EN681-1 for drinking water networks, fire networks, irrigation networks, sewage networks and rain water network.

## Marking

## Installation

- The ultra large tolerance flange adaptors cover all the outside diameters of pipes (DE) from 49 to 348 without discontinuity. For each model the maximum DE is higher than the minimum DE of the following model : ex: DE Maxi A = 71 DE Mini B = 62 - Margin = 9 - DE Maxi H = 241 DE Mini I = 23 - Margin = 6
- Linking with all the normalized flange pieces according to : ISO 7005-2 - ISO 2535 - EN 1092-2
- Possible angular deflection : 6 degrees

- J measured on the axis
- Maximum angular deflection of 6° with J maxi for a section at 90° of the pipe
- Screwing of the bolts diametrically opposite to a torque included between 60 and 70 Nm.
- Linking with a wafer valve to be avoided

## Centering Tab Gasket
