

¼ turn locks - Heads of handling

Pentagonal form requiring the use of the handling key PENTA

[Handling key PENTA](#)

Head of control to the complex form, difficult to read by the people badly disposed and incompatible with the usual tools.

Require the [handling key SCS](#).

This key is solidarized in head of handling. It can be to release only by voluntary action.

It is not conceived for the rising of the covers nor of the gratings and it is strongly disadvised using it for the handling of those.

It is important to think of withdrawing the key before back in circulation of the inspected manhole covers or gratings.

USE OF **SCS** KEY

(UNLOCKED COVER)

- 1

Lift the trigger.
Push the key onto the bolt.
- 2
