## Field of application:

- D400 class (Group 4) according to standard EN124-2, carriageways of roads, hard shoulders and parking areas for all types of road vehicles.
- In accordance with the regulations concerning accessibility for people with reduced mobility.

## Main characteristics:

- Flat grate with automatic spring bar locking.
- Hinged grate.
- Three-sided flange frame for installation along a kerb.
- Install Plus compatible for fast and durable installation.
- Kerb
- The gully grate is designed with bars oriented longitudinally along the water flow on the curb side to optimize runoff absorption, while on the roadway side the bars are positioned perpendicular to the traffic direction to reduce risks for cyclists. At the same time, it meets People with Reduced Mobility (PRM) accessibility requirements thanks to spacing and geometry compliant with current regulations, ensuring a system that is both efficient for stormwater management and safe for all users, including PRM's.
