

Installation of the DEDRA 600 Flat Grating D400 class

The broad flanges of DEDRA 600 gratings enable to obtain a good bedding as well as a reduced transmission of the loads to the structure located under the gratings.

The various versions of frame enable to choose the version most adapted according to the installation confines:

- Frame equipped of 4 flanges for multi-directional collection in roadway or on parking or frame equipped of 3 flanges for installation along a kerb.

Kerb setting

Installation type multi-directional collection
