

Identification of PAMREX manhole covers versions

Versions of PAMREX manhole covers

The different versions of PAMREX manhole covers frames are identified by a letter affixed on the frame with the right of the opening box:

- E = Operation
- S = Safety (blocking of the cover with 90°)

The absence of letter indicates a safety version.

These functionalities are given only by a different geometry from the hinge box and are thus kept during a change of cover.

Form of the frame

The form of the frame is identified by a circle or a square in the content of the opening box.
This information is useful during the cutting of the coated around the manhole cover.

The information on this sketch is, to the best of our knowledge correct at the time of printing. However Saint-Gobain are constantly looking at ways of improving their products and services therefore reserve the right to change without prior notice, any of the data shown. Any orders placed will be subject to our Standard Conditions of Sale, available on request.
